EDUCATION

The University of Hong Kong (HKU), Hong Kong | Bachelor of Engineering **Graduated: July 2026**
• Major in Computer Science | **CGPA: 3.49**

YMCA of Hong Kong Christian College, Hong Kong | International A levels. **Graduated: June 2022**
• Subjects taken: Advanced level Physics, Advanced level Chemistry, Advanced level Maths.
• Grade: **3 A***
• Awards: Top 10 performance in GCE A level May/June 2022 exam series among the cohort

EXPERIENCE

Computational Programmer SLR lab | Faculty of Education, University of Hong Kong **June 2025 – July 2025**
• Developed an **interactive calendar scheduling system** for the ASD intervention web platform using the **Quasar Framework**, improving appointment management and usability.
• Implemented backend functionality with **Node.js**, supporting real-time scheduling and system integration.
• Integrated **video conferencing capabilities** using the **Live Kit SDK**, enabling seamless online sessions between teachers and clients.
• Authored **Swagger API documentation** to standardize backend endpoints and improve maintainability and collaboration across the development team.

SLR Lab Summer Programming Intern | Faculty of Education, University of Hong Kong **July 2024 – September 2024**
• Designed and developed the appointment interface webpage for ASD intervention, enhancing user experience
• Teamwork – Collaborated with UI designers and team members to ensure responsive and carefully planned designs.
• Created multiple user-centric pages and reusable components, including the join meeting page, meeting dashboard and calendar page, improving functionality and accessibility. Implemented a language toggle button component, enabling seamless switching between English, Traditional Chinese and Simplified Chinese, enhancing accessibility for diverse users in the bilingual webpage.

Student Teaching Assistant | School of Computing & Data Science, University of Hong Kong **Jan 2025 – June 2026**
• Mentoring- Served as a Student Teaching Assistant for AILT1001: Artificial Intelligence Literacy 1, an introductory course to AI and AI literacy, assisting a class of over 500 students and mentored 20 students one-to-one through group tutorials
• Hands on Guidance- Facilitated biweekly tutorial sessions and provided hands-on guidance with constructive feedback on the various use AI tools as well as guidance towards the final class project on the future developments of AI.

PROJECTS

Generative AI & Mobile Systems for Archaeological Research | Final Year Project **Sept 2025 – Apr 2026**
• Tech Stack: React Native, TypeScript, Python, Fast API, Next.js, Lang Chain, PostgreSQL, Chroma DB, Docker
• Developed an integrated offline-first mobile application and agent-based AI web platform to unify archaeological field data capture with AI-driven knowledge retrieval for the APSAP research initiative.
• Built a multi-modal agentic AI chatbot using Lang Chain and Fast API, implementing a Retrieval-Augmented Generation (RAG) pipeline with layout-aware OCR and Chroma DB vector search to query domain-specific archaeological literature.
• Designed a safeguarded Natural Language to SQL (NL2SQL) tool for the agent enabling researchers to query structured excavation records, achieving **100% SQL validity and a 0% hallucination rate** through strict read-only sanitization and schema enforcement.
• Attained **94% factual accuracy in literature responses and 90% Recall@6 in semantic retrieval**; containerized the full-stack system using Docker and NGINX for scalable, reproducible deployment.

LANGUAGE AND OTHER SKILLS

Languages: English (Native) | Chinese (conversational level proficiency) | Nepali (Native)
Soft Skills: Problem-solving | Teamwork | Analytical skills | Creativity | Presentation skills

TECHNICAL PROFICIENCY

• **Programming Languages:** Python • C++ • JavaScript • Typescript • Java • SQL • Haskell
• **Others:** Linux • Git/GitHub • HTML • CSS • R Language • Vue.js • React.js • Django • Fast API • Node.js
